## The CUBE Stereo ONE family - a Stereo ONEderland

*CUBE launches a revised and comprehensive full suspension mountain bike range, bringing Stereo performance to every rider: ONE bike for everyone.*

Eagle Mountain bikers know that the best bike for off-road is a full suspension bike. But not all mountain bikers are the same, and every trail is different. CUBE's Stereo range has always encapsulated the full gamut of mountain biking, from the nature-loving weekend explorer to the alp-bagging enduro rider, and everyone in between.

Now, with a completely revised Stereo ONE range, there really is a bike to suit any rider. Kinematics, geometry and spec are all carefully tailored to intended use. The result? No compromise.

CUBE is calling it Stereo ONEderland – a smorgasbord of suspension delights with something to suit every mountain biker's taste.

For riders with curiosity running through their veins, the evergreen Stereo ONE22 is a great choice: 120mm of travel, straightforward handling and the ideal weekend adventurer.

The brand new Stereo ONE44 promises all-mountain performance, with a choice of advanced C:68X<sup>®</sup> or C:62<sup>®</sup> carbon frames, 140mm of progressive travel, adjustable geometry and a built-in storage compartment.

There's also a new Stereo ONE55 for riders who prefer their trails on the spicy side; combining up to 160mm of travel and C:62<sup>®</sup> carbon frame technology with an angle adjustable headset, down tube storage and enduro-focussed geometry and kinematics.

Not enough travel? Then you'll be wanting the 29er wheel-equipped, 170mm travel Stereo ONE77 with its coil or air shock-ready setup, adjustable geometry, flip chip and the option of premium C:68X<sup>®</sup> carbon construction for the ultimate in low weight, high strength and big hit ability.

And finally, there's the 160mm travel Stereo Hybrid ONE55 – a new full power, enduro-capable e-bike with full C:68X<sup>®</sup> carbon frame, Bosch CX Smart System and up to 750Wh battery capacity for rugged, agile and versatile trail-taming.

The idea is simple: whichever Stereo ONE you choose, it'll be the ONE bike to change your riding forever.

Models: Stereo ONE22, Stereo ONE44, Stereo ONE55, Stereo ONE77, Hybrid Stereo ONE55
